Meeting Agenda

Group meeting for group C7

§1 Objectives

- We need to structure up MVC better.
- We need to think about the SDD more.

§2 Reports

Hugo Ekstrand:

- Finished the Layers task. That is, finished system for affine transformations in Layers.
- Written a on the SDD at Quality/Tests and System design/overhead view of model and The Tools Package

Love Gustafsson:

- Continued with LayerManger. Almost done now just needs to add support for observing (observer pattern) the LayerManager.

Elias Ersson:

- Started refactoring view so that it follows MVC better.

Isak Gustafsson

- Started implementing Project

§3 Discussion Items

1. We need to make the MVC structure better:
 - a. We need to separate view and model more. Create their own packages.
 - b. We also need to modularise the controller. Create Factories and such.
 - c. We need to remove the descriptions string from IToolProperty in the model.
2. We need to start writing more on the SDD. We have not written enough on it as we work.

§4 Outcomes and assignments

Outcomes:

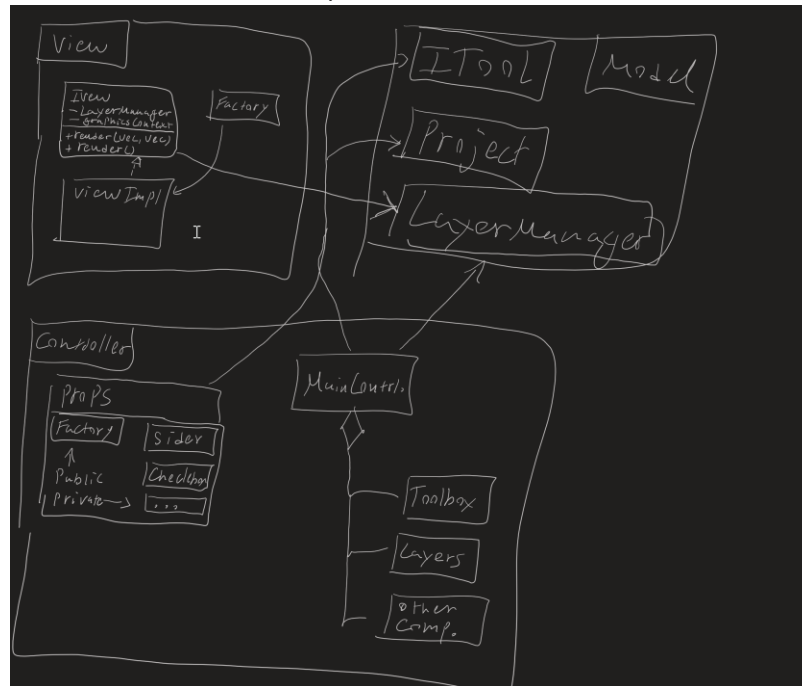

1. We started looking at ways to better structure the view and controller.

Facilitator: Hugo Ekstrand

Participants: Hugo Ekstrand, Love Gustafsson, Elias Ersson

Date: 2021-10-05

- a. We drew a simple sketch of how the view and controller package should look so that it is more modular and separated.

- b. We decided we could create some form of a HashMap where the description for IToolProperties is in the controller. That is, a HashMap takes the name of the property and returns a tooltip for it.

Assignments:

Elias Ersson:

Will continue refactoring the view and controller.

Love Gustafsson:

Will finish the LayerManager.

Hugo Ekstrand:

Will help with the refactor of the view and controller.

Will also write on the SDD in the system design and quality chapters.

Will also add finished user stories to the RAD.

Isak Gustafsson

Will finish the Project class to have a complete model.
