Facilitator: Hugo Ekstrand
Participants: Hugo Ekstrand, Isak Gustafsson, Love Gustafsson, Elias Ersson, Leo Karlsson Oinonen
Date: 2021-09-10

Meeting Agenda

Group meeting for group C7 with supervisor

§1 Objectives

- Domain model. How is it?
- Workflow and user stories. Have we done it correctly?
- Trouble with initial tasks overlapping.

§2 Discussion Items

1. How is the domain model? Is it detailed enough?
   a. Should there be more elements?
   b. Can we add methods in the classes?
2. Are our user stories limited enough; are they appropriately not overlapping?
3. How should one start a task if it depends on the interface of another's task?

§3 Outcomes and assignments

Outcomes:

1. It is okay, though we should probably do it up in a software, so that it is not just a sketch.
2. They're good. We should also get more info in the next lecture on Monday about how to do them even better.
3. We should create simple mock-up implementations of the interfaces so that we can work and test but not spend time on doing someone else's task.

§4 End of Meeting

Next meeting is Tuesday, 2021-09-14, 10:00 at TBD
