Facilitator: Hugo Ekstrand
Participants: Hugo Ekstrand, Love Gustafsson, Elias Ersson, Isak Gustafsson
Date: 2021-10-21

Meeting Agenda

Group meeting for group C7

§1 Objectives

- When to do presentation work
- What's left to do? SDD, RAD, last user stories?

§2 Reports

General text of what has been done.

Hugo Ekstrand has:

- Added an eraser tool
- Generified Brush in tools to be a class that performs strokes. This is because eraser overwrites the layer and any other current brush blends their color with the layer.
- Generified view so that it can handle thumbnail rendering and project rendering.
- Worked on SDD (written in design patterns section and also made view package class diagram).

Love Gustafsson:

- Continued working on LayerFactory.

Isak Gustafsson:

- Finished user story for saving and loading projects. It is not performant, and there will not be enough time to optimize it.

Elias Ersson:

- Add functionality to move layers around in the GUI. Also added basic functionality to add layers, however a size cannot be chosen yet.

§3 Discussion Items

1. Should color for a brush be global in the project?
2. When should we work on the presentation?

§4 Outcomes and assignments

Outcomes:

Facilitator: Hugo Ekstrand
Participants: Hugo Ekstrand, Love Gustafsson, Elias Ersson, Isak Gustafsson
Date: 2021-10-21

1. We will use the current system of every tool having its own state, including color. This is mainly because it works and we do not have time to change it; other matters are more pressing, such as SDD.
2. We will work on the presentation during Sunday and Saturday since we need to write more on the SDD before we can fully start with the presentation. We also have the presentation during Monday, so we need to start working on it really soon.

Assignments:

Love Gustafsson:
- Will add functionality to make view's visible or not visible in LayerManager. This will later be added to the layer controller.

Elias Ersson:
- Will continue working on the add layer functionality by adding a dialog pane to choose size.
- Will do the same for cerating new projects.

Hugo Ekstrand:
- Will create new STAN diagrams for the quality section in SDD.
- Will write on the system design section in the SDD.
- Will potentially also do some work on the presentation for Monday, such as creating the presentation and setting the basic structure of the technical walkthrough.
- Add the last user stories to the RAD.

Isak Gustafsson:
- Will write on the persistent data section in the SDD.

Everyone will most likely write on the SDD a bit. Even if one has been assigned a specific area we will most likely work on more sections.

§5 End of Meeting

Next meeting is Friday, 2021-10-22, 13:00 at M1203D
