Facilitator: Hugo Ekstrand

Participants: Hugo Ekstrand, Love Gustafsson, Isak Gustafsson, Elias Ersson

Date: 2021-09-28

Meeting Agenda

Group meeting for group C7

§1 Objectives

- Next user stories.
- Layers seems to be taking longer than expected.

§2 Reports

We've all written a bit in the RAD so that it's up to date.

Hugo Ekstrand has:

- Written in the system architecture.
- Fixed some bugs in Tool Patterns.

Love Gustafsson:

- Started implementing the concrete LayerManager class.

Elias Ersson:

- Started working on a layer manager to the view.
- Started working on Integer property handler to the view.

§3 Discussion Items

1. What user stories/features should we look at implementing next? Some will be hard to test since the LayerManager/Layer system is not done yet.
2. Maybe we should divide up the layer system even more since it is taking longer than expected?

§4 Outcomes and assignments

Outcomes:

1. We started looking at what user stories can be done next.
   a. The undo system may be an option, however we concluded that an event system would be beneficial if we are to implement the undo system.
   b. Being able to configure the project canvas size and save/export location would also be a good candidate.
   c. Some sort of sharpen/blur/etc. filters is a third candidate, together with more tools.

2. The layer class is almost done, and it would be hard to work on the same file (LayerManager) at the same time. Potentially someone could work on the layer class if it still has not progressed much till next meeting.

Assignments:

§5 End of Meeting

Next meeting is Thursday, 2021-09-30, 13:00 at F4114
